

HOT TUB FILTER CARE LOG

MODEL-SPECIFIC CLEANING | CONDITION CHECK | RETEST RECORD

FILTER & SPA DETAILS

Spa make/model

Filter brand/part #

Manual cleaner instructions

Filter installed date

Manual rinse interval

Manual replace interval

BEFORE CLEANING: CHECK THE FILTER CONDITION

☐ Pleats intact

☐ No cracked end cap

☐ No broken bands / tears

☐ No persistent odor or residue

If a part is damaged, the cartridge cannot be cleaned, or flow remains poor: stop and check the maker's replacement/service guidance.
Filtration is not disinfection. Test sanitizer + pH separately before the spa is used.

CLEANING / INSPECTION HISTORY

Log actions using the product label and filter manual

Date	Rinse / approved cleaning action	Condition / flow observed	Follow-up / replacement date

SAFE PROCEDURE

Power off per manual > Remove approved cartridge > Hose-rinse between pleats > Use approved cleaner only if directed > Rinse / reinstall
Always follow the precise model manual; do not use a washing machine or pressure washer. Never run the spa with filter/suction components removed.
