

HOT TUB ODOR DIAGNOSIS & RETEST LOG

Test first. Trace the source. Record the follow-up.

**STOP & CHECK BEFORE SOAKING**  
No soaking with cloudy/slimy water, irritating fumes, or unsuitable sanitizer / pH readings.  
Do not add chemicals based on odor alone. Follow your sanitizer product label and spa manual.

|             |                    |                    |    |            |                |                           |
|             |                    |                    |    |            |                |                           |

FOLLOW-UP NOTES / PERSISTENT ODOR

☐ Sanitizer + pH tested

☐ Cover/filter/source checked

☐ Product label followed

☐ Retested before use

**GENERAL CDC HOT TUB REFERENCES:** Free chlorine >=3 ppm | Bromine 4-8 ppm | pH 7.0-7.8  
Specific registered products and integrated systems may require different procedures. Retest and follow exact label instructions.
