

Sauna Door Measurement & Safety Checklist

For comparing quotes and reviewing safe entry, exit and installation.

1 | Confirm product dimensions

- ☐ Write exact door make, model, glass/wood choice and approved hardware.
- ☐ Record leaf dimensions, frame outside size and manufacturer rough opening.
- ☐ Verify floor finish and threshold datum before taking the height measurement.
- ☐ Mark outward swing and hinge side on the plan; check open-door collisions.

2 | Check exit and heater compatibility

- ☐ Confirm the door opens easily from inside without a keyed lock.
- ☐ Check glazing, frame, handles, hinges and catch are sauna-rated.
- ☐ Verify any under-door gap against the sauna ventilation design.
- ☐ Give glass area to heater supplier for model-specific sizing review.

3 | Verify completed installation

- ☐ Operate the door several times from inside; confirm free opening.
- ☐ Check hinges and catch without forcing the panel or tempered glass.
- ☐ Keep installation, adjustment, cleaning and inspection instructions.

Project notes & measurements

Item	Write the supplier/model/measurement here
Exact door model / supplier	_____
Leaf / frame / rough opening	_____
Swing direction and clear passage	_____
Air gap / glass area / heater review	_____
Installer and final check date	_____

No universal door dimension is assumed. Use model-specific drawings, manufacturer instructions and applicable safety rules.
